

Create a DataBase in Cloudant:

TEAM ID: PNT2022TMID15065

In this milestone we have successfully created Cloudant Database Services which will be used for the completion of this project. Hereby we have attached the screenshot of the Database.

The screenshot displays the IBM Cloudant Databases dashboard. The left sidebar contains navigation links for Monitoring, Databases, Replication, Active Tasks, Account, Support, and Documentation. The main content area is titled 'Databases' and shows a table of 'Your Databases'. The table has columns for Name, Size, # of Docs, Partitioned, and Actions. Two databases are listed: 'noderedzchildsafety' (15.7 KB, 3 docs, not partitioned) and 'sample' (22 bytes, 1 doc, not partitioned). Each database has three action icons: a plus sign, a lock, and a trash can. The bottom of the dashboard shows a pagination bar indicating 'Showing 1-2 of 2 databases' and a dropdown for 'Databases per page' set to 20.

Name	Size	# of Docs	Partitioned	Actions
noderedzchildsafety	15.7 KB	3	No	  
sample	22 bytes	1	No
